

When everything is perfect, you can feel it.

The Ultimate Comfort System™ combines the best of the Dave Lennox *Signature*® Collection to create unprecedented whole-home comfort that's perfectly tuned to your home. From the very moment it's installed, this intelligent system seamlessly works together to deliver clean, perfect air and maintain optimal performance. This is nothing short of the most advanced, efficient and capable heating and air conditioning system the world has ever seen. This is perfect air fully realized.

Consistently perfect.

Forget temperature swings and having the weather dictate humidity. This system delivers clean, perfect air and maintains your home's ideal temperature and humidity level with pinpoint accuracy. Period. And with iHarmony zoning, you can optimize and personalize your air throughout different sections of your home. That way, the only way your air feels is how you want it to feel.

Complete control.

Whether on our proprietary iComfort S30 or on your own smart device, your system and ideal settings are never more than a tap or voice command away. Plus, your system is intelligent enough to diagnose and troubleshoot anything that arises, and, if necessary, immediately notifies your HVAC installer. So you can be assured it's always perfectly tuned to your home.

Beyond quiet.

Hear that? Of course you didn't. Even with all of its impressive power, this system has been engineered to drastically minimize sound output to seamlessly operate at a noise level that is, quite simply, unheard of.

Overworked system running up your bills?

More efficient than any system ever. Including a standard-setting furnace that boasts a 99% efficiency rating- that means it essentially converts every last bit of energy it uses into heating and cooling the home- and cooling products that achieve efficiency ratings of up to 28 SEER. Best of all, the energy saved is as healthy for your wallet as it is for the environment.

The air conditioner, heat pump and furnace have also been designated as Most Efficient ENERGY STAR® certified products in 2021. Products that are recognized as the Most Efficient of ENERGY STAR in 2021 prevent greenhouse gas emissions by meeting rigorous energy efficiency performance levels set by the U.S. Environmental Protection Agency.

No more sniffing and sneezing.

From dust, pollen and dander to mold and germs to odors and chemical vapors, indoor air carries all sorts of unwanted, health-affecting contaminants. Fortunately, the unparalleled PureAir™ S reduces and destroys them with thorough filtration and a powerful air purification technology. Not only will it remove 99.9% of allergens and 90% of virus-sized particles, it is the only single system to combat all three major types of indoor pollutants.

This is Seamless Precision.

From heating and cooling to air purification and effortless controls, every component of the Ultimate Comfort System works seamlessly together to deliver nothing short of perfect air.

- ① PureAir™ S Purification System
- ② iHarmony® Zoning System
- ③ iComfort® S30 Ultra Smart Thermostat

- ④ SL28XCV Air Conditioner/ XP25 Heat Pump
- ⑤ SLP99V Gas Furnace

“So quiet I can hardly tell it’s running...”

- Skytalker

“More comfortable, lower humidity, my bill is 25% lower.”

- Stephen762

“The system is fantastic. Quiet, efficient, and simply awesome.”

- Websters
