

ELEVATE YOUR ENVIRONMENT

ELITE[®]
SERIES

EL280E | GAS FURNACE

Two-stage gas furnace with constant torque motor design for even temperatures

LENNOX[®]

NEXT-LEVEL PERFORMANCE

The Elite® Series takes the Lennox® promise of exceptional comfort and performance to the next level. This superior product family delivers remarkable efficiency. It's time to elevate your environment. It's time for Lennox® Elite.

Elevate Your Air.

Use less energy.
Save more money.

Save money and energy with the EL280E gas furnace. The Power Saver™ constant torque motor design inside the EL280E gas furnace adjusts airspeed based on demand. Whether you're heating or cooling, that means you'll use less energy and see lower utility bills.

Fine-tune your
environment

The EL280E gas furnace features two-stage operation using a bigger flame when heating demands are greater, and a smaller flame when they're not, so you get more even temperatures and lower gas usage.

Efficient and versatile

The EL280E gas furnace has an 80% AFUE* energy rating, which can significantly reduce your heating costs compared to older furnaces. And because it's dual-fuel capable, you can pair it with a Lennox heat pump for even more efficient operation.

*AFUE, or Annual Fuel Utilization Efficiency, is a measure of how much usable heat is generated when natural gas is burned in the furnace. The higher the AFUE, the more heat you'll get from your natural gas, and the less gas you'll have to use to stay warm.

**Covered components may be eligible to receive a 10-year warranty. Online equipment registration at www.lennoxregistration.com is required within 60 days of installation (except in California and Quebec) or Lennox' base warranty will apply. Applies to residential applications only. See actual warranty certificate for details.

Note: Due to Lennox' ongoing commitment to quality, specifications and ratings are subject to change without notice.

California Only

If installed in South Coast Air Quality Management District (SCAQMD) only: This furnace does not meet the SCAQMD Rule 1111 NOx emission limit (14 ng/J), and thus is subject to a mitigation fee of up to \$450. This furnace is not eligible for the Clean Air Furnace Rebate Program: www.CleanAirFurnaceRebate.com.

If installed in San Joaquin Valley Air Pollution Control District (SJVAPCD) only: This furnace does not meet the SJVAPCD Rule 4905 NOx emission limit (14 ng/J), and thus is subject to a mitigation fee of up to \$450.

UP TO 46% GREATER EFFICIENCY THAN STANDARD MOTORS
