

## Elite<sup>®</sup> heat pumps come appointed with:

Precision-balanced, direct drive fan to keep the noise low and the savings high

Reinforced with a PermaGuard™ cabinet for long-lasting protection against rust and corrosion

SmartHinge™ coil protection for easy coil cleaning

Softer lines create an appliance-like appearance

Cabinets built using superior materials and proprietary designs make Lennox<sup>®</sup> units more durable, safer and easier to install

Dual-fuel compatible with Lennox furnaces for added cost savings

## Heating Seasonal Performance Factor (HSPF)

A heating efficiency rating for heat pumps. A higher-rated HPSF heat pump will result in less energy use and increased energy savings over the life of the system.

## Seasonal Energy Efficiency Ratio (SEER)

This rating determines a heat pump's efficiency. The higher the SEER rating, the more energy-efficient it is.

## Digital-Ready Unit

A unit that maximizes its efficiency with digital communication features when paired with the iComfort S30 and other iComfort<sup>®</sup>-enabled components. On its own, it's remarkably efficient, compact and quiet—and ready to step up to a fully digital system at any time.

## ENERGY STAR<sup>®</sup> Certified

HVAC equipment with the ENERGY STAR label meets or exceeds federal guidelines for energy-efficient performance.

## 10-Year Limited Warranty on Compressor

All Elite models come with a 10-Year Limited Warranty on compressors.

## Dual-Fuel Compatibility

An HVAC system that pairs an electric heat pump with a gas furnace and alternates between the two fuel sources to maximize comfort and efficiency.

## Quantum Coil<sup>™</sup>

Our exclusive coil is made from a proprietary aluminum alloy for improved resistance to corrosion, resulting in improved performance and energy savings.

## iComfort<sup>®</sup>-Enabled Option

An iComfort-enabled product is designed to work with an iComfort smart thermostat as part of an advanced home comfort system. This is a truly digital product that offers unprecedented control, giving you the ability to more precisely maintain temperature, humidity, and air quality compared to older analog systems.

## 5-Year Limited Warranty on Covered Components

Covered components may be eligible to receive a 10-year warranty. Online equipment registration at [lennoxregistration.com](http://lennoxregistration.com) is required within 60 days of installation (except in California and Quebec) or Lennox' base warranty will apply. Applies to residential applications only. See actual warranty certificate for details.

### How does single-stage, two-stage & variable-capacity work?

72°

Single-Stage

Unit is either on or off, creating wide temperature swings.

72°

Two-Stage

Unit runs at either low or high speed, using the lower speed 80% of the time.

72°

Variable-Capacity

Unit runs at low most of the time, using only the amount of energy necessary to meet comfort need.
